Informatics and Computing Engineering student. I worked on a programming project that helped users access contact information for company employees, saving time and effort, as well as integrating Excel functionalities.

EXPERIENCE

Municipalidad de Iquique

Computing and Informatics Engineering intern

Iquique, Chile

January 2024 - March 2024

- Process modeling using Bizagi Modeler.
- Requirements gathering of a problem and solution proposal.
- Process modeler, user interface design, authentication system using JsonWebTokens, password hashing, endpoints construction, database integration, hosting the app in the company network.
- Implementation of a functionality that allows the users to interact with the database using Excel:
 - Download of data: exporting information from the database into an Excel file.
 - Uploading data: processing data in an Excel spreadsheet and saving it to the database.
- The project construction helps the users to save time and effort by displaying all the user data, avoiding moving to the sixth floor of the building to ask for contact information of a person.
